

Heliport Light Controller Model: CM-HT12/G

Product Description

CM-HT12/G is a heliport indoor and outdoor light controller, suits all kinds of heliport lights' on/off controller. It controls and shows all the heliport navigation lights' work status. This product is outdoor type, and ingress protection is IP65, can be used in the indoor and outdoor directly.

Application

The house is made of steel painted by spraying plastic finish which is corrosion resistance and anti-UV.

- It has 6 circuits of output, and it can be changed according to requirement. There are Auto, Manual and Remote three modes for user's choice.
- CM-HT12/ This controller is powerful, reliable, safe, easy to use and maintain, convenient.

Remark: This is customized controller, having function of LED screen monitoring all lights' working status, provide dimming function of heliport TLOF , FATO and AIM direction landing lights.

There are total 8 circuits outputs, 2 or 3 outputs for AC220-230V and 6 or 5 outputs for DC48V.

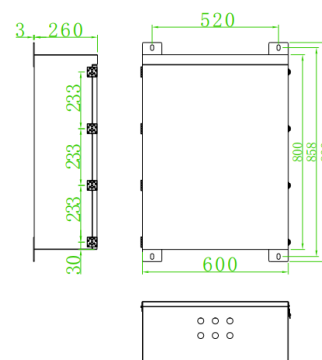

Provide the RS485 connection port and having software program for this controller. More details should be reference the installation and operation manual

Specification:

Item	Parameter
Model	CM-HT12/G
Operating voltage	AC220V, DC48V (With dimming function)
Power consumption	≤30W
Load capacity	≤4KW
Ingress Protection	IP65
Operating temperature	-40°C~55°C
Environment Humidity	0~95%
Weight	40 kg
Overall Dimension (mm)	780mm×500mm×263mm
Altitude	≤2500m
Quality Assurance	ISO9001:2015
